

## SGS Tool Europe Ltd.

### More than just another Cutting Tool Supplier

SGS Europe's head office is based at a new state-of-the-art facility in Wokingham near London.

The focus at SGS Tool Europe is the manufacture of special cutting tools, high accuracy form tools, as well as modifications and regrinds.

From this facility we provide:

- A fast track for special tools via our Rapid Response Centre.
- Research & Development for new products and continual testing of current products.
- Customer projects / application testing.
- Application and tooling recommendations.
- Production engineering support.
- Dedicated CAD/CAM engineering support– Delcam / Catia / NX / Vericut.

From this facility we also service the European market with a full range of high performance and standard end mills plus drilling products and offer:

- £3 million stock centre with over 150,000 stock items available.
- Same day shipment on ex-stock items for all orders received before 17.00 CET.
- 97% stock availability for catalogue range.
- Your specific product items stocked on request (including special tools).
- Multi-lingual European time zone for sales and technical support.
- Our new online portal for live EU and US stock availability, pricing, discount information, plus 24 hour order placement.
- On site application support.
- High performance product and application training, including access to the new SGS Tool Clinic Programme.

SGS Tool Europe specialises in the supply of high performance tools for the Aerospace, Medical, Automotive and Motorsport, Nuclear and Power Generation, Defense and Precision Engineering industries.
